

## **Company Profile**

Shenzhen C-Data Technology Co., Ltd., established in 2009, is a globally leading provider of information and communication products and solutions. With over 10 subsidiaries and divisions worldwide, our company operates in 50+ countries and regions.

C-Data focuses on the research and development of information and communication technology, providing comprehensive access network solutions, home networking solutions, and small-scale business solutions to operators, ISPs, MSOs, and government-enterprise clients. Our product portfolio includes a wide range of offerings such as ONU, OLT, HFC, EOC, Wireless Access, Switches, OTN, Cloud Platforms, and Smart Software Systems.

We firmly believe that research and development drive innovation, and our products create value. Committed to realizing our corporate vision of "Connecting the World with Data Technology", C-Data delivers efficient and convenient products and services to government-enterprise, household, and individual users.
